We trust that you share our opinion that the condition of the exhibition floor is an important factor of creating an impression and overall experience about an event. Therefore, with the intention of ensuring that the floors of the exhibition halls are maintained at their optimum appearance, we have identified three recommended types of adhesives types for the use in the halls. We would request that you revert to the below document for further information on the approved adhesive tapes and share the same with your customers.

#### Adhesive tapes used for exhibition halls (Space only exhibitors)

In the effort to ensure that the floors of the exhibition halls are kept at the highest standard of appearance, we have set guidelines for the use of adhesive tapes and for a mutual benefit, we would like to request your adherence to the same.

1. The only recommended type of tapes to be used are:

Euro tape

Eurocel

Advance tape

- 2. Plastic packing tape, gaffer tape, masking tape or drafting tape, which are the most difficult to remove from floors, are not to be used.
- 3. The Licensee is responsible for ensuring that adhesive tapes used to fix carpets or other materials to floor areas are removed after use. without damages to the floor.
- 4. The Company will examine floors after the removal of tapes and if the floor surface is found to be damaged particularly from the use of tapes other than as approved by the Company, the Licensee will be liable for the cost of repairs. Any tapes not removed by the contractor will be removed by the Company at the licensee's expense.
- 5. A higher rate will be charged for the removal of tapes, which are not approved by the Company.

We are confident that this process will have a positive impact on the quality of the product and service, and ultimately will reflect on your satisfaction level from the event as a whole.

### INTERNET

Due to the variability of wireless network signals within the exhibition environment, Dubai World Trade Centre operates the following;

- 1. Wireless internet networks installed by exhibitors and their contractors can only function on 2.4GHz, however DWTC does not recommend this for product demonstration due to interference from multiple networks and is unable to offer any technical support on this frequency.
- 2. Dubai World Trade Centre operates a "Clean Air" policy on wireless internet networks functioning on 5GHz and will reserve the right to switch off any unauthorised 5GHz wireless networks.
- 3. Any orders for internet access must have the required information detailed in full before the order will be processed.

### 5) Clean Air Policy:

Contd./

## Data & Telecom Services Form\_2013 vog.12\_26E

### 5) Clean Air Policy:

#### a. Purpose

As the 5GHz Wi-Fi wireless networking uses the shared resource of the unlicensed radio frequencies, it is necessary to regulate the usage of such devices within the Dubai World Trade Centre (DWTC) venues.

By applying this policy, reliable and secure Wi-Fi based services can be provided at DWTC. This policy applies to all 5GHz wireless networking devices and users on DWTC premises.

### b. Policy

### **Ownership and Management of Radio Airspace**

DWTC is the owner of the 5GHz unlicensed radio frequencies on its property, that is, the 5GHz Unlicensed National Information Infrastructure (UNII) bands used in wireless networking. DWTC is responsible for managing these radio frequencies for the benefit of DWTC users. DWTC may restrict use of any devices that can cause interference in the unlicensed radio frequency ranges.

DWTC is solely responsible for providing wireless networking services within its venues and offices. No other entity may deploy wireless network access points or other wireless service in its space. Private wireless access points in the exhibition halls, concourse areas, meeting rooms or offices are strictly prohibited. DWTC reserves its right to sanction non-compliance.

DWTC is responsible for maintaining a secure network and will deploy adequate security mechanisms to support wireless networking in the venues.

DWTC deployed a 5GHz wireless network to cover all its venues, based on the 802.11a/n standards. DWTC will work with other entities to accommodate special needs, where technically feasible. DWTC will collaborate with organizers and tenants where devices used for specific business reasons may require specific solutions.

#### Wireless Service Considerations

Wireless networking has bandwidth limitations compared to the wired network. The wireless network should be viewed as augmenting the wired network, to provide more flexible network use. Applications that require large amounts of bandwidth, or are sensitive to changes in signal quality and strength may not be appropriate for wireless access.

### Standards supported

IEEE 802.11a/n is the preferred wireless networking standard. Security standards may be applied as needed.
